Customer Bulletin-Discontinued Model F446 and Model B Flooding Valve

25 March 2004

Dear Friends and Valued Customers,

Tyco Fire Products would like to announce that the Model DV-5 Diaphragm Style Deluge Valve is now available in sizes 1 1/2 inch through 8 inch (8" in May). The Model DV-5 offers many advantages. It has a high-pressure rating of 250-psi. It has one internal working part – no linkage or clapper assembly, and allows for external resetting. It has a lightweight ductile iron body with both internal and external coating, making it ideal for some seawater and brackish water supplies.

Discontinued Products:

Effective immediately, the Model F446 (DV-3HP), 2" High Pressure Deluge Valve, (page 13-3 of the 2004 Price List) has been discontinued and will only be available until inventory has been depleted. The Model DV-5 250-psi deluge valve in 2" or 3" sizes can be used as a replacement for the Model F446. The following parts will be affected:

Part No.	Model F446 (DV-3HP) Deluge Valve	Tech Data
524461001	2 1/2" Threaded Inlet & Outlet	TD 114M
524461002	2 1/2" Grooved Inlet & Outlet	TD 114M

In addition, the 2" Model B Flooding Valve (DV-2) has been discontinued and will be replaced by the 2" Model DV-5. We will continue to offer the Model B Flooding Valve until inventory is depleted, approximately through the end of September 2004. Orders will be filled on a first come, first serve basis. The Model B Flooding Valve can be found on page 13-4 of the 2004 Price List. The following part will be affected:

Part No.	Model B (DV-2) Flooding Valve	Tech Data
520201009	2" Model B Deluge Valve	TD 117A

More information on the Model DV-5 can be found on our on-line technical data book in the deluge and preaction valve section. Please visit us on the web at www.tyco-fire.com.

Should you need further assistance or need more information, please contact your Regional Sales Representative. Thank you for your continued support and loyalty.

Sincerely,
