## Price Increase

June 30, 2021

Dear Valued Customer,

Our LFP® Antifreeze products prices have remained the same since launch despite rising raw material cost increases. We maintained our price for as long as possible in the hope that these increases would be temporary. Unfortunately, our supplier for raw materials has notified us that we will see a substantially higher increase for antifreeze raw materials than we have seen in the past. Therefore, we are announcing a price increase for LFP® Antifreeze products of 11.8%.

Orders must be placed prior to the close of business on July 15, 2021 and shipped no later than the close of business on August 16, 2021 to receive current pricing. All orders placed at current pricing will be accepted subject to product availability, and orders received after July 15<sup>th</sup> will only be accepted at the new pricing levels.

We are committed to providing industry-leading products at a fair value and will continue to make investments in new offerings to help you better serve your customers. To demonstrate our commitment, we are happy to announce the addition of a new product size – LFP® Antifreeze products are now available in 250 gallon tote size as well as 5 gallon pails and 30 gallon drums.

Best Regards,

**Michael Mottice**  
Director, America Sales
